

Lead – Biometric Ecosystem (JDLBE1021)

OUR NEED

MOSIP's open-source-based digital foundational ID system is expanding globally every day. As our operations expand, we are making strides towards being a key stakeholder in the global effort towards making invisible citizens visible in countries across the world in terms of financial equality, healthcare, and democratic rights. The MOSIP ecosystem includes leading biometric service providers and large system integrators, along with a set of innovative companies working on cutting-edge technology and standards. There are numerous efforts in progress to build a network of elite technology providers compatible with MOSIP.

We are in search of the strong and capable technical program manager to lead the API compliance efforts and help with integration of commercial ecosystem products with the MOSIP platform, during country implementations and pilots.

KEY RESPONSIBILITIES

- Interfacing validation and integration of various products from commercial ecosystem partners including, but not limited to, biometric devices, ABIS, SDK and credential printing
- Managing quality assurance of products
- Leading enhancement of interface validation test kits
- On-boarding and hand-holding of partners during testing of kits and environments
- Documentation and SOPs on product integrations
- Leading project planning sessions
- Managing project progress and adapting work as required
- Optimising and improving processes and overall approaches where necessary
- Conducting project reviews and creating detailed reports for executive staff
- Assisting adopting countries in defining requirements to meet system needs
- Overseeing all incoming and outgoing project documentation

ABOUT YOU

Skills and Experience:

- 10+ years relevant experience in project implementation, program management, and stakeholder management

- An understanding of foundational identity systems and open-source ventures
- Experience in handling multi-vendor environments
- Experience in running certification environments and product compliance validation initiatives
- Basic understanding of biometrics – acquisition, deduplication, and processing
- Strong written and verbal communication skills
- Ability to multi-task, manage various project elements simultaneously, and manage high-stakes situations
- Demonstrably strong leadership skills, big-picture vision, and attention to detail
- Conflict resolution skills

JOB TYPE AND LOCATION

Full-time consulting position, based in Bangalore, India

HOW TO APPLY

Apply by sending your resumé, not exceeding two pages, along with a 300-word letter of motivation to sanjith@mosip.io

PLEASE NOTE

We value the safety of each member of our community. Due to COVID-19, most of our colleagues are working from home. We have implemented a virtual hiring process and interview candidates by phone or through a video call and are on boarding new hires remotely.
