

DevOps Engineer – Togo (JDDOET0921)

OUR NEED

MOSIP's open-source-based digital foundational ID system is expanding globally every day. As our operations expand, we are making strides towards being a key stakeholder in the global effort towards making invisible citizens visible in countries across the world in terms of financial equality, healthcare, and democratic rights. We are looking for a strong and capable DevOps Engineer in Togo to focus on deployments and continuous and efficient integration.

KEY RESPONSIBILITIES

- Managing deployment of the platform for development and testing
- Providing support to System Integrators in rolling out digital functional ID systems in various countries adopting the MOSIP platform
- Helping in the development and automation during the deployment process

ABOUT YOU

Skills and Experience:

- Hands-on experience with automating DevOps procedures
- Prior experience in working on the deployment of production-grade systems and field experience of troubleshooting in such a live system
- Strong understanding of the Linux administration
- Experience with CI/CD pipelines using Jenkins or similar tools, and in working with AWS and Azure
- Excellent command over scripting using Python, Perl, or Shell
- Working experience of Configuration Management Tools (Chef, Ansible and Terraform)
- A working knowledge of Java will be an added advantage
- Experience with Container Technologies and schedulers, including Docker, Kubernetes
- Fluency in both English and French preferred

Academic Qualifications: Bachelor's or Master's Degree in computer science, information science, or equivalent experience

JOB TYPE AND LOCATION

Full-time consulting position, based in Lomé, Togo

HOW TO APPLY

Apply by sending your resumé, not exceeding two pages, along with a 300-word letter of motivation to gabi@mosip.io.

PLEASE NOTE

We value the safety of each member of our community. Due to COVID-19, most of our colleagues are working from home. We have implemented a virtual hiring process and are interviewing candidates by phone or through a video call and are onboarding new hires remotely.
